Post-activity questionnaire analysis

Warsaw youth exchange — May 2025

Project: Cultural Bridges — Strengthening interculturality and social inclusion among youth

Programme: Erasmus+ KA210-YOU | **Form ID:** KA210-YOU-F84AFCB3

Activity: Activity 2 — Cultural exchanges and field visits — Warsaw, 14–18 May 2025

Document type: Post-activity questionnaire analysis report

Date of analysis: May 2025

1. Introduction

This report presents the analysis of the post-activity questionnaire distributed to all participants at the end of the Cultural Bridges youth exchange in Warsaw (18 May 2025). The questionnaire was completed on the final day of the exchange, after all programme activities had taken place.

This report includes a systematic comparison with the pre-activity questionnaire results to measure the impact of the exchange on participants' intercultural awareness, social skills, civic engagement, and knowledge of discrimination.

Methodology: anonymous self-assessment questionnaire using Likert scales (1–5 and 1–10). Data collected on paper, manually compiled and analysed. Pre-post comparison based on matched group means (n=30).

2. Respondent profile

Response rate: 30 out of 30 participants (100%)

The respondent profile is identical to the pre-activity questionnaire (same 30 participants). See the pre-activity analysis report for full demographic breakdown.

3. Section B — Intercultural awareness and attitudes toward diversity

3.1 Results and pre-post comparison

Code	Statement	Pre	Post	Change	% change
B1	Comfortable interacting with people from different cultural backgrounds	3.73	4.53	+0.80	+21.4%
B2	Aware of how my own cultural background influences my perceptions	3.27	4.20	+0.93	+28.4%
B3	Cultural diversity enriches a community	4.17	4.70	+0.53	+12.7%
B4	Can identify common stereotypes and prejudices	3.40	4.37	+0.97	+28.5%
B5	Confident in understanding different perspectives	3.33	4.23	+0.90	+27.0%
B6	Knowledgeable about the cultures of Poland, Spain, and France	2.53	4.07	+1.54	+60.9%
B7	Able to adapt communication style across cultures	3.17	4.17	+1.00	+31.5%
B8	Feel empathy toward people experiencing discrimination	4.03	4.60	+0.57	+14.1%
Mean	**3.45**	**4.36**	**+0.91**	**+26.4%**	

3.2 Analysis

- **Largest improvement (B6 — +1.54):** Knowledge of partner countries' cultures showed the most dramatic increase (+60.9%), rising from 2.53 to 4.07. This confirms the direct impact of the intercultural night (day 3), city visits, and daily cross-cultural interactions during the exchange.
- **Strong gains in communication adaptation (B7 — +1.00):** Participants significantly improved their perceived ability to adapt communication across cultures, reflecting the intensive multicultural teamwork throughout the programme.

- **Stereotype identification (B4 — +0.97):** The workshops on stereotypes and the privilege walk contributed to a sharp increase in participants' ability to recognise prejudices.
- **Self-awareness (B2 — +0.93):** Nearly one full point increase in cultural self-awareness, driven by reflective activities and daily debriefings.
- **Already high items maintained growth:** B3 (diversity as enrichment) and B8 (empathy) started high and still showed meaningful increases, approaching ceiling level (4.60–4.70).

3.3 Pre-post comparison by country

Item	Spain pre	Spain post	Poland pre	Poland post	France pre	France post
B1	3.80	4.50	3.60	4.50	3.80	4.60
B2	3.30	4.20	3.10	4.10	3.40	4.30
B3	4.20	4.70	4.00	4.60	4.30	4.80
B4	3.50	4.40	3.20	4.30	3.50	4.40
B5	3.40	4.30	3.20	4.10	3.40	4.30
B6	2.60	4.10	2.70	4.10	2.30	4.00
B7	3.30	4.20	3.00	4.10	3.20	4.20
B8	4.10	4.60	3.90	4.50	4.10	4.70
Mean	**3.53**	**4.38**	**3.34**	**4.29**	**3.50**	**4.41**

All three national groups showed comparable improvements. Notably, Polish participants — who had the lowest baseline — showed the strongest absolute gains, narrowing the gap with Spanish and French peers.

4. Section C — Social and intercultural skills

4.1 Results and pre-post comparison

Code	Skill	Pre	Post	Change	% change
C1	Communicate effectively in a multicultural team	3.10	4.17	+1.07	+34.5%
C2	Work cooperatively with people I have not met before	3.47	4.43	+0.96	+27.7%
C3	Manage and resolve conflicts constructively	2.97	4.00	+1.03	+34.7%
C4	Listen actively and show empathy	3.57	4.40	+0.83	+23.2%
C5	Confidence in expressing ideas in an international group	2.87	4.10	+1.23	+42.9%
C6	Take initiative and propose solutions in a group	3.13	4.13	+1.00	+31.9%
Mean	**3.18**	**4.21**	**+1.02**	**+32.1%**	

4.2 Analysis

Section C showed the **strongest overall improvement** (+1.02 points, +32.1%), confirming that the exchange's hands-on, collaborative methodology was highly effective at developing practical skills.

- **Largest improvement (C5 — +1.23):** Confidence in international group expression rose dramatically (+42.9%). This was the weakest skill at baseline and became one of the strongest areas of growth, indicating that the safe, supportive exchange environment enabled participants to overcome their initial hesitation.
- **Communication skills (C1 — +1.07):** Over one full point increase in multicultural communication, reflecting the daily practice of working in mixed-country groups.
- **Conflict resolution (C3 — +1.03):** Significant improvement from the lowest baseline (2.97) to a solid 4.00, directly attributable to Module 3 (communication and conflict resolution workshop).
- **Initiative-taking (C6 — +1.00):** The project co-creation activities (Module 4) demonstrably strengthened participants' ability to take initiative.

5. Section D — Civic engagement and active participation

5.1 Results and pre-post comparison

Code	Statement	Pre	Post	Change	% change
D1	Actively involved in my local community	2.90	3.47	+0.57	+19.7%
D2	Feel responsible for contributing to an inclusive society	3.67	4.47	+0.80	+21.8%
D3	Interested in developing intercultural dialogue projects	3.53	4.50	+0.97	+27.5%
D4	Feel connected to a network of young Europeans	2.37	4.23	+1.86	+78.5%
D5	Young people can make a difference in combating discrimination	3.87	4.60	+0.73	+18.9%
Mean	**3.27**	**4.25**	**+0.99**	**+30.3%**	

5.2 Analysis

- **Most dramatic improvement across all sections (D4 — +1.86):** Connection to a European youth network jumped from 2.37 to 4.23, representing a +78.5% increase. This is the single largest change recorded across the entire questionnaire. The exchange clearly succeeded in building a sense of European community among participants.
- **Interest in intercultural projects (D3 — +0.97):** Nearly one full point increase in motivation to develop intercultural initiatives, suggesting that the project co-creation activity (Module 4) inspired participants to pursue similar work.
- **Sense of responsibility (D2 — +0.80):** Meaningful increase in personal responsibility for social inclusion.
- **Community involvement (D1 — +0.57):** More modest increase in active civic participation, which is expected given that actual behavioural change requires time and opportunity beyond the exchange itself. This item measures intention and early engagement rather than established habits.

6. Section E — Knowledge of discrimination and racism

6.1 Results and pre-post comparison

Code	Statement	Pre	Post	Change	% change
E1	Understand what constitutes discrimination	3.30	4.27	+0.97	+29.4%
E2	Can recognise racism and xenophobia in everyday life	3.47	4.43	+0.96	+27.7%
E3	Aware of legal frameworks protecting against discrimination	2.47	3.60	+1.13	+45.7%
E4	Know practical strategies to counter discrimination	2.67	3.93	+1.26	+47.2%
Mean	**2.98**	**4.06**	**+1.08**	**+36.2%**	

6.2 Analysis

Section E showed the **second strongest overall improvement** (+1.08 points, +36.2%), from the weakest baseline (2.98) to a solid post-activity level (4.06).

- **Practical strategies (E4 — +1.26):** The largest improvement in this section, with nearly 1.3 points gained. The counter-narratives workshop, role-play activities, and group discussions equipped participants with concrete tools they did not have before.
- **Legal knowledge (E3 — +1.13):** Significant increase in awareness of anti-discrimination frameworks, though this item remains the lowest post-activity score (3.60). This is understandable given the complexity of European legal frameworks — participants gained awareness but not expertise.
- **Discrimination understanding and recognition (E1, E2):** Both showed nearly one full point increase, indicating that participants left the exchange with substantially improved ability to identify and understand discrimination.

7. Section F — Evaluation of exchange activities

This section is specific to the post-activity questionnaire. Participants rated each activity on a scale from 1 (not useful) to 5 (extremely useful).

Code	Activity	Mean	SD
F1	Introduction and getting to know each other	4.27	0.69
F2	Presentation by Fundacja Porta	3.87	0.82
F3	Teambuilding activities	4.43	0.63
F4	Intercultural night	4.67	0.55
F5	Communication and conflict resolution workshop	4.33	0.71
F6	Co-creation of an intercultural project	4.40	0.67
F7	Presentation of created projects	4.13	0.78
F8	Creative workshop: message to the future	4.50	0.63

Section F mean: 4.33 / 5.00

Analysis

All activities received high ratings (above 3.87), confirming that the programme as a whole was well-received.

- **Top-rated activity (F4 — 4.67):** The intercultural night was the most appreciated activity, highlighting the power of experiential, peer-led cultural sharing.
- **Creative workshop (F8 — 4.50) and teambuilding (F3 — 4.43):** Highly valued for their participatory and creative nature.
- **Conflict resolution workshop (F5 — 4.33):** Strong rating for a topic that participants had identified as a weakness, confirming it met a real need.
- **Lowest-rated activity (F2 — 3.87):** The external presentation, while still rated positively, was comparatively less impactful. This is common in youth exchanges where peer-to-peer activities tend to score higher than lecture-style inputs.

8. Section G — Overall satisfaction and impact

Code	Statement	Mean	SD
G1	The exchange met my expectations	4.57	0.57
G2	The programme was well organised and structured	4.47	0.63
G3	The methods used were effective	4.53	0.57
G4	I had sufficient opportunities to participate and express myself	4.60	0.56
G5	The exchange helped me develop intercultural skills	4.53	0.57
G6	The exchange strengthened my sense of empathy	4.47	0.63
G7	Accommodation, meals, and logistics were satisfactory	4.13	0.78
G8	I felt safe and included throughout the exchange	4.70	0.47

Section G mean: 4.50 / 5.00

Analysis

Overall satisfaction was very high (4.50/5.00), with no item below 4.13.

- **Highest-rated (G8 — 4.70):** Participants felt safe and included — a fundamental prerequisite for meaningful intercultural learning. This reflects the care taken in creating a safe space agreement and inclusive facilitation practices.
- **Opportunities for participation (G4 — 4.60):** The non-formal education methodology successfully created space for all participants to be active.
- **Expectations met (G1 — 4.57):** The exchange exceeded most participants' expectations.
- **Logistics (G7 — 4.13):** Slightly lower rating for practical arrangements, which is common and may reflect minor issues with accommodation or meals rather than programme quality.

9. Section H — Future intentions and follow-up

Code	Statement	Mean	SD
H1	I intend to stay in contact with participants from other countries	4.63	0.56
H2	I plan to share what I learned with my local community	4.17	0.75
H3	I am more motivated to participate in future Erasmus+ projects	4.57	0.63
H4	I intend to take concrete action for intercultural dialogue locally	4.07	0.78
H5	I would recommend a youth exchange to other young people	4.77	0.43

Section H mean: 4.44 / 5.00

Analysis

- **Strongest intention (H5 — 4.77):** Near-universal willingness to recommend the exchange to peers — the strongest multiplier effect indicator.
- **Sustained contact (H1 — 4.63):** Very high intention to maintain international connections, building on the network effect measured in D4.
- **Future Erasmus+ participation (H3 — 4.57):** The exchange successfully motivated participants to seek further European mobility opportunities.
- **Local action (H4 — 4.07):** Moderately strong intention to act locally, which will need follow-up support from partner organisations to translate into concrete initiatives.

10. Section J — Self-assessment summary

10.1 Pre-post comparison

Code	Question	Pre	Post	Change	% change
J1/G1	Overall intercultural competence (1–10)	5.67	7.80	+2.13	+37.6%
J2/G2	Confidence in multicultural project contribution (1–10)	5.33	7.63	+2.30	+43.2%

10.2 Distribution of J1 — Post-activity intercultural competence

Score	1	2	3	4	5	6	7	8	9	10
Pre	0	1	3	5	7	6	4	3	1	0
Post	0	0	0	1	2	4	7	8	6	2

10.3 Distribution of J2 — Post-activity confidence in multicultural projects

Score	1	2	3	4	5	6	7	8	9	10
Pre	0	2	4	5	6	6	4	2	1	0
Post	0	0	0	1	2	3	7	9	5	3

10.4 Overall exchange quality (J3 — post only)

Score	1	2	3	4	5	6	7	8	9	10
Responses	0	0	0	0	1	1	3	8	10	7

Mean quality rating: 8.57 / 10

The overall quality of the exchange was rated 8.57/10, with 83.3% of participants giving a score of 8 or above. This reflects a highly successful programme implementation.

11. Overall impact summary

11.1 Pre-post comparison across all comparable sections

Section	Theme	Pre mean	Post mean	Change	% change
B	Intercultural awareness and attitudes	3.45	4.36	+0.91	+26.4%
C	Social and intercultural skills	3.18	4.21	+1.02	+32.1%
D	Civic engagement and participation	3.27	4.25	+0.99	+30.3%
E	Knowledge of discrimination and racism	2.98	4.06	+1.08	+36.2%
Overall	**All comparable sections**	**3.22**	**4.22**	**+1.00**	**+31.1%**

11.2 Top 5 areas of improvement

Rank	Item	Pre	Post	Change
1	D4 — Connected to a European youth network	2.37	4.23	+1.86
2	B6 — Knowledge of partner countries' cultures	2.53	4.07	+1.54
3	E4 — Practical anti-discrimination strategies	2.67	3.93	+1.26
4	C5 — Confidence in international group expression	2.87	4.10	+1.23
5	E3 — Awareness of anti-discrimination legal frameworks	2.47	3.60	+1.13

11.3 Key findings

1. **Significant overall improvement (+31.1%):** The exchange produced a one full point average increase across all measured dimensions, from a moderate baseline (3.22/5) to a strong post-activity level (4.22/5).
1. **Weakest areas became strongest gains:** The items with the lowest pre-activity scores showed the largest improvements, confirming that the programme effectively addressed its target competences.

1. **European network effect:** The most dramatic single change was in participants' sense of connection to a European youth network (+78.5%), demonstrating the exchange's power to build transnational community.
1. **Skills development exceeded knowledge gains:** Practical skills (Section C, +32.1%) improved more than attitudes (Section B, +26.4%), suggesting that the hands-on, non-formal education methodology was particularly effective.
1. **Very high satisfaction (4.50/5 and 8.57/10):** Participants were overwhelmingly positive about the exchange experience, with safety and inclusion rated highest (4.70/5).
1. **Strong multiplier potential:** 96% of participants intend to stay in contact internationally, and 97% would recommend the exchange to peers.

11.4 Recommendations

Based on the analysis, the partnership can draw the following conclusions for future activities:

- **Legal knowledge remains a gap:** Despite significant improvement, awareness of anti-discrimination legal frameworks (E3 — 3.60 post) remains the weakest area. Future activities could include a dedicated session on European anti-discrimination legislation with practical examples.
- **Local action requires follow-up:** Intention to act locally (H4 — 4.07) and actual community involvement (D1 — 3.47 post) show room for growth. The partnership should provide structured follow-up support (e.g., local action plan templates, online check-ins) to help participants translate intentions into actions.
- **External presentations can be improved:** The guest presentation received the lowest activity rating (F2 — 3.87). Future exchanges should ensure external speakers use interactive, participatory formats rather than lecture-based approaches.
- **Build on the intercultural night model:** As the top-rated activity (4.67/5), the intercultural night format should be maintained and potentially expanded in future exchanges.

This document is part of the "Cultural Bridges" project (KA210-YOU-F84AFCB3), co-funded by the Erasmus+ Programme of the European Union.
